TRINITY IT

CAPABILITY STATEMENT

CORPORATE DESCRIPTION

Trinity Information Technology, LLC (Trinity IT) is focused on providing the highest quality software development and support services to the DoD. Trinity IT's software development, system administration, and specialized training services enable government missions to run smoothly in both routine and mission critical situations. Our specialty is reliable software development & support, running in secure cloud platform environments. Since 2007, our team has supported six prime vendors to successfully complete forty-four Task Orders on schedule and within budget- with revenue during that period exceeding $20M.
